Resolved issues in PVOS 8.1.6

Review the resolved issues in this release.

Note These release notes don't provide a complete listing of all resolved issues that are included in the software. User experience updates, performance fixes, and enhancements may not be included. In addition, the information in these release notes is provided as-is at the time of release and is subject to change without notice.

Table 1. Resolved issues

Category	Issue ID	Product	Description
Calling	VOICE-77767	Poly CCX 505	Disabling use of hands-free audio using up.handsfreeMode="0" doesn't work if the change is made after a call is active.
Calling	VOICE-77700	Poly Trio C60	The in call duration display in a Teams Room setup on the Poly Trio C60 in USB Optimized mode was incorrect.
Certificate management	VOICE-77687	Poly CCX, Poly Trio	Certificates renewed using SCEP trigger 802.1x authentication failures where logging states "unknown CA".
Device management	VOICE-77743	Poly CCX 350, Poly Trio C60	802.1x EAP-TLS authentication fails when settings and root CA certificates are installed using Poly Lens a configuration policy.
Device management	VOICE-77713	Poly CCX	Quickly toggling an audio termination on and off in the Zoom Phone application can cause the phone to maintain a hidden active call that blocks scheduled reboots.
Hardware	VOICE-77962	Poly CCX 505	Placing a second call using the BLF line key while the phone is in an active call causes a reboot.
User interface	VOICE-77709	Poly CCX 600	The EAP method displays as unknown in the 802.1x status menu.
Cloud service	VOICE-77604	Poly CCX EM60	The Poly CCX EM60 doesn't show in Lens device analytics reports.
Interoperability	VOICE-77530	Poly CCX, Poly Trio	Downgrading to a Zoom APK intermittently results in app data from the previous APK not being cleared. This resulted in the inability of the user to sign in to the downgraded app.
